ENGLISH SYLLABIFICATIONS: *Atlantic*: NOTES

Atlantic

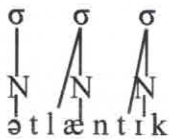

//ətlæntɪk//. Note: I ignore the question of the vowel in the first syllable and assume that it is schwa.

 N Placement

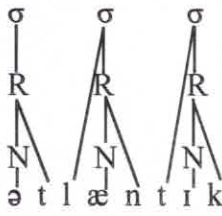

The diagram shows the phonetic transcription ətlæntɪk with three 'N' symbols above it. Vertical lines connect the 'N's to the syllable boundaries: the first 'N' is above the first syllable (ətl), the second 'N' is above the second syllable (læn), and the third 'N' is above the third syllable (ntɪk).

 CV Rule

The diagram shows the phonetic transcription ətlæntɪk with three 'σ' symbols above it. Lines connect the 'σ's to the syllable boundaries. The first 'σ' is above the first syllable (ətl), the second 'σ' is above the second syllable (læn), and the third 'σ' is above the third syllable (ntɪk).

 Complex Onset Rule
 [t] can't go into the onset: blocked by Lateral Onset Constraint
 [n] can't go into the onset: blocked by the SSG

The diagram shows the phonetic transcription ətlæntɪk with three 'σ' symbols above it. Lines connect the 'σ's to the syllable boundaries. The first 'σ' is above the first syllable (ətl), the second 'σ' is above the second syllable (læn), and the third 'σ' is above the third syllable (ntɪk).

 Coda Rule: [t], [n] and [k] go into the coda

The diagram shows the phonetic transcription ətlæntɪk with three 'σ' symbols above it. Lines connect the 'σ's to the syllable boundaries. The first 'σ' is above the first syllable (ətl), the second 'σ' is above the second syllable (læn), and the third 'σ' is above the third syllable (ntɪk).

— Complex Coda Rule: not applicable as there is nothing to syllabify
